The map isn't detailed enough to use it as a driving map; not detailed enough to use as a guide in cities; too large to fit in the purse. I thought I might use it for the high level detail driving guide, but the signage in Croatia was better than trying to pull out the map. I really don't know how it will be useful at all to anyone trying to get around Croatia.

Michelin should do something about the quality of paper they use. Used this on a recent 16 day car trip around Croatia. After two days I used taping up the back of the map to keep it together. It was accurate and useful. Just wish it had been stronger.
