It is a large easy to use paper road map, printed only on one side (which I like because I like to write on my maps during the trip, and I don't have to worry about ink bleeding through and damaging what is printed on reverse side). The map has a laminated cardstock outside cover, which protects it when folded properly. However, it causes cuts in the map when you try to fold it 'open' for viewing specific areas. I tried to pull the cover off my first map, but it started tearing the map. I highlighted each road we took during the trip, using a different color for different days. I made trip notes on the map, adding places we visited, and dates. I ordered the 2nd map so I can transfer my annotations carefully more artfully to the new map. I am thinking of making a wall hanging and adding a scattering of travel pictures over untraveled areas. I think it is something we would enjoy looking at to reminisce. 8 of 8 people found the following review helpful. The best map of Great Britain By Sara Vaughan Essential to purchase, with or without a GPS. We drove all over GB with this map and it was a lifesaver. We had GPS and still needed this map several times a week. Don't sacrifice quality for price by purchasing a cheaper map and don't drive in the UK without it! 3 of 3 people found the following review helpful. I love this map By L.A. I love this map. It's huge, but folds up great. It's laminated so it won't rip easily. It's going to be so handy when we go to Europe next summer.

Renowned for over 100 years for their clear, accurate and easy-to-read mapping, Michelin country maps give travelers an overall picture of their route, with practical road and travel information; and city maps containing extensive street indexes orient them quickly so they can find their way to their destination.
