Michelin : Michelin Green Guide Chateaux of the Loire, 9e (Green Guide/Michelin) before purchasing it in order to gage whether or not it would be worth my time, and all praised Michelin Green Guide Chateaux of the Loire, 9e (Green Guide/Michelin):

useful information in the book and the beautiful photographs as well. I love the Michelin star system and find that it in fact lines up beautifully with my interests when I travel. Something rated 3 stars I do usually find fantastic and the things they find worth mentioning or just giving one star to I mostly agree with. This book somehow manages to be light enough and of a size and shape that make it very portable and not at all a hassle to take along. The information given helped us both in the planning stages helping us choose which chateaux to devote our time to and also while we were there, we could pull this out and read up a little on our next stop or look something up about the history of where we were visiting. I browsed a few different guides before making my choice and I'm very pleased with my choice. It seems like a lot of people choose the Eyewitness guide for this and although it is pretty to look at, I just didn't find the information as thorough as in this Michelin guide. 2 of 2 people found the following review helpful. broader than expected By William Sweeney I was expecting this guide to only be about the chateaux of the Loire, a reasonable expectation given the title. But in fact it is a more generally useful guide, and probably should be given the title "Guide to the Loire, with lots of information about the Chateaux." A pleasant surprise. 0 of 0 people found the following review helpful. The Best of the Bunch By Kit There are a number of Loire Valley guides but I found this one to be the best by far. The details and added insights made our week in the Loire so much more meaningful and interesting. It really was our companion throughout our visit.

Respected cultural travel guides featuring Michelin stars and tours. This brand new, completely revised edition features the best of the Chateaux of the Loire. The Loire Valley is a cultural landscape of great renown and beauty, noteworthy, too, for the very high quality of its architectural heritage, boasting more than 300 chateaux in and around such historic towns as Amboise, Angers, Blois, Chinon, Saumur and Tours. So rich and diverse is this pedigree that in December 2000, UNESCO added the central part of the valley to its list of World Heritage Sites. Tours, maps, full-color photos, illustrations and plenty of new content help you explore the Chateaux, while Michelin's celebrated star-rating system and respected maps make sure you see the best that the Loire Valley has to offer. Use with Michelin Road Map No. 517.

From the Publisher One Team: A Devotion to Quality There's just one reason our team is dedicated to producing quality travel publications—you, our reader. We want you to get the maximum benefit from your trip—and from your money. In today's multiple-choice world of travel, the options are many, perhaps overwhelming. In our guidebooks, we try to minimize the guesswork involved with travel. We scout out the attractions, prioritize them with star ratings, and describe what you'll discover when you visit them. To help you orient yourself, we provide colorful and detailed, but easy-to-follow maps. Floor plans of some of the major museums help you plan your tour. Throughout the guides, we offer practical information, touring tips and suggestions for finding the best views of the city, a good place for a break or where to make that special purchase. Lodging and dining are always a big part of travel, so we compile a selection of hotels and restaurants that we think convey the feel of the city, and organize them by geographic area and price. We also highlight shopping, recreational and entertainment venues, especially the hot spots. If you're short on time, two- and four-day itineraries are included so you can hit the highlights and quickly absorb the best of the destination. For those of you who love to experience a destination on foot, we add walking tours, complete with a map. And we list other companies who offer boat, bus or guided walking tours of the city, some with culinary, historical or other themes. In short, we test and retest, check and recheck to make sure that our guidebooks are truly just that: a personalized guide to help you make the most of your visit. After all, we want you to enjoy traveling as much as we do. The Michelin Green Guide Team
