**From Michelin Travel Publications : Michelin Green Guide Rome (Michelin Green Guides)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Michelin Green Guide Rome (Michelin Green Guides):

1 of 2 people found the following review helpful. Michelin Green Guide for RomeBy Gilbert ReeserThe Michelin Green Guide is still the best. The history and tours will turn you into your own expert guide. The star system lets you select the best spots to visit within your time frame. It will fit in your pocket, but it is not a light weight guide. Durable and easy to use, it is a classic.6 of 6 people found the following review helpful. Absolutely essentialBy TravelModI've browsed and borrowed several guidebooks, and the ones I relied on for taking with me and walking around with (as opposed to pre-trip research) were Fodor's, and Michelin's Green Guide for Rome. The latter has no restaurant or hotel information, but excellent historical and cultural notes--more than some people want, perhaps. My only criticism of it is that the index is not good: some listings are under the Latin or Italian names, (many churches are found under the listing "chiesa" for example),some are under the English translation names, and some important topics or sites are not actually listed in the index at all, but they do appear in the book. Topics are well-organized into walking itineraries.0 of 0 people found the following review helpful. Michelin Green Guides Rule!By Julian MoonI use several travel guides but always refer to Michelin Travel Guides to get a flavor of the history/time line, geography, weather, and special events of a country. You can't beat prices.

### Michelin Green Guide Rome

From the PublisherOne Team: A Devotion to Quality There's just one reason our team is dedicated to producing quality travel publications—you, our reader. We want you to get the maximum benefit from your trip—and from your money. In today's multiple-choice world of travel, the options are many, perhaps overwhelming. In our guidebooks, we try to minimize the guesswork involved with travel. We scout out the attractions, prioritize them with star ratings, and describe what you'll discover when you visit them. To help you orient yourself, we provide colorful and detailed, but easy-to-follow maps. Floor plans of some of the major museums help you plan your tour. Throughout the guides, we offer practical information, touring tips and suggestions for finding the best views of the city, a good place for a break or where to make that special purchase. Lodging and dining are always a big part of travel, so we compile a selection of hotels and restaurants that we think convey the feel of the city, and organize them by geographic area and price. We also highlight shopping, recreational and entertainment venues, especially the hot spots. If you're short on time, two- and four-day itineraries are included so you can hit the highlights and quickly absorb the best of the destination. For those of you who love to experience a destination on foot, we add walking tours, complete with a map. And we list other companies who offer boat, bus or guided walking tours of the city, some with culinary, historical or other themes. In short, we test and retest, check and recheck to make sure that our guidebooks are truly just that: a personalized guide to help you make the most of your visit. After all, we want you to enjoy traveling as much as we do.The Michelin Green Guide Team
