Michelin Travel Publications : Michelin Rome Mini-Spiral Atlas No. 2038 (Michelin Maps Atlases) before purchasing it in order to gage whether or not it would be worth my time, and all praised Michelin Rome Mini-Spiral Atlas No. 2038 (Michelin Maps Atlases):

0 of 0 people found the following review helpful. Invaluable for walking and driving! By KellyGirlsI purchased this map as well as the Knopf Mapguide for Rome. The Knopf is extremely cute. The Michelin is extremely useful. For our 7 day trip we walked virtually everywhere taking very few taxis. The Knopf map has no index and list only major streets. Unless you enjoy backtracking a lot you need a very detailed map. Paris and Rome have many side streets

going in various directions often meeting towards a circle. You may have five or six streets intersecting. Of those, many are quite short. We found ourselves everyday just standing at a corner trying to figure out which direction to walk and that was WITH this detailed map. I can't imagine going to a city like Rome without a good map like this one. 0 of 0 people found the following review helpful. I like them better than any other maps I have used. By S. Kalat I have used these spiral bound maps from Michelin for Rome and Paris. I like them better than any other maps I have used. They are easy to carry and convenient to use. I had bought some maps that fold open but you can't really use them on the street or subway or bus. They also usually didn't have a street index. The map book has references to adjacent pages on top, side, and bottom of each page making it easy to find the adjacent map section. I like these spiral bound map books and think they are the best. It appears that Michelin has stopped making the spiral bound map book of Paris so you should buy a used copy ASAP if you are even thinking about a trip to Paris. 1 of 1 people found the following review helpful. not very useful in many ways. By MjrReader This is much too small to really get a good sense of going from one area to another in Rome. Also, I want to be able to write my own notes - such as bus routes etc, and this paper is laminated. I don't know of any times in all my travels that I pull out a map whilst standing in the rain so why all this water resistant paper for maps? Also, since the description is limited I didn't know this until I received the map. Now I must pay to return. Not worth it.

Spiral format street plan with index. Includes practical information, one way streets, car parks, taxi ranks, public transport, public buildings and post offices. Scale: 1/10000 - 1cm = 100m Legend/Key in 6 languages (French, English, German, Italian, Dutch, Spanish)
