From Brand: Michelin Travel Pubns : Michelin the Green Guide Netherlands (Michelin Green Guides) before purchasing it in order to gage whether or not it would be worth my time, and all praised Michelin the Green Guide Netherlands (Michelin Green Guides):

I find it extremely user UNfriendly, and short on lots of vital information. While there are some nice maps and some pieces of good data, the organization is appalling. Instead of a division by regions, it is in encyclopedia fashion -- alphabetical place names. Places that get 3 stars (their top rating -- must see) on some of the maps don't show up in the index or as a place heading. When you find something interesting in the text, you have to wonder, where is it in the country? Good luck finding further data. Prices and estimated costs? Forget it -- there are none. I suppose that reduces their costs of updating versions. Data on hotels and restaurants? No -- you have to buy Michelin's separate book, their "red guide." Meaningful information on any form of travel other than by car? Not here. Trying to plan a trip with this guide? Lots of luck.1 of 8 people found the following review helpful. Beware Pricing SystemBy TravelerI put this in my cart on April 5th at \$13. When I went to check out on April 8th, the price had been raised to the list price of \$20.
