Stefania Scaini, Ellen Locatelli : Milan little tourists guide book before purchasing it in order to gage whether or not it would be worth my time, and all praised Milan little tourists guide book:

The historical itinerary presented here tells of a Milan which has the taste, style and simplicity of those who look at Milan with inquisitive eyes. The visitor finds him/herself immediately in front of the main door of the Duomo to look for a dinosaur! This guidebook is undoubtedly a new and imaginative way to see the city. It is perfect for school

children but also for those visiting the city for the first time and for the Milanese themselves.
