Shocart : Moldau (Vltava) River (Czech Republic) Canoeing Map Guide by Shocart (2012-12-10) before purchasing it in order to gage whether or not it would be worth my time, and all praised Moldau (Vltava) River (Czech Republic) Canoeing Map Guide by Shocart (2012-12-10):

Moldau (Vltava) River (Czech Republic) Canoeing Map Guide, 2012 edition A5 size (approximately 1/2 of letter size), 64-page, saddle stitched map guide for use in navigating the Vltava river between Borova Lada and Hluboka. The route (total length 152 km / 95 miles) is covered by 13 maps at scale 1:50,000. Map legend as well as the key to the boating symbols is in English, Czech and German. Other text, i.e. guide, description of points of interest, etc. is in Czech only. Detail includes locks, bridges, distance indicators, water guages, marinas, rapids, danger points, facilities eg. hostels, grocers campsites, as well as roads, landmarks and attractions. The maps also show marked hiking trails along the river. Locks and weirs are presented by a diagram, photo and mileage indicator plus a suggested way(s) how to get over them. Included are an overview map of the area at scale 1:310,000 plus two full-page street plans of Cesky Krumlov and Budweis. The Moldau (Vltava) River is the most popular river for canoeing, kayaking and rafting in the Czech Republic. Boat renting facilities are abundant.
