Great Guidebooks ... but ...By Readz AlotBradt should be commended for producing guidebooks to locations that few other companies (even the ubiquitous Lonely Planet) have tried to tackle. This book is typical for the series -- exploring out of the way and little known destinations and offering a mixture of practical information and cultural background. The one flaw of the book is one common to most guidebooks in the series. Information about opening hours for sites tends to be sketchy at best. They USUALLY give hours for museums, but not for other sites. If one is spending several months in a place, this may not be a problem, but if a traveller is trying to plan a vacation and has limited time, it can be very helpful to know when specific sites are open. Also, while the hotel information is quite detailed, complete with prices; restaurant info is also sketchy, rarely providing opening hours/days, and almost never giving more than the vaguest indication of price. ("Moderate" isn't much help, really!) 1 of 1 people found the following review helpful. Train from Podgorico to BelgradeBy Eugene SasserIt was just what I needed. It gave info about the train from Podgorico to Belgrade the website for the timetable reservations payment. The journey should be spectacular, I'm looking forward to it in just 5 months. 0 of 1 people found the following review helpful. Mostly High-End ListingsBy PedestrianPerhaps I'm looking for something else, but it seemed most of the restaurants and hotels listed were fairly pricey. After doing some websearches, I found a castle to stay in for 10 Euro a night since Montenegro is largely undiscovered. There were many, many other cheaper,

better, and fantastically located places to be found online, whereas the book had a smattering of listings of highend places to stay and eat. The plus side of this book is that it is one of the few travel books on Montenegro so it's tough to do without.
