0 of 0 people found the following review helpful. over priced, hard to download, and not very usable.By ellen fosterThis was a PIA to download. My computer savy son took quite awhile doing it and I don't think I could have don it at all. Now that it is downloaded, it has good photo id's of different animals and plants, but it is not organized in a way that it will be easy to use. Mostly it is pretty pictures. I don't think it was worth the price.0 of 0 people found the following review helpful. Five StarsBy Dive MasterCovered a lot of dive areas and had a lot of maps.
