Mark Brackenbury : Normandy and Channel Islands Pilot before purchasing it in order to gauge whether or not it would be worth my time, and all praised Normandy and Channel Islands Pilot:

The ninth edition of this pilot has been thoroughly revised in the light of major changes to this popular coastline. Mark Brackenbury gives details of new deep water harbours at Carteret and Dielette, describes le Treport's newly developed yacht harbour, and includes a completely new entry for Port Mer, Cancale. He also details the development of a large yacht harbour in Dieppe's avant port, giving 24 hour access, and a new lock at the entrance to Honfleur, doubling the harbour's accessibility and making it possible to make the passage to Rouen on the same tide. Mark Brackenbury is the

author of numerous pilotage guides, including this pilot.
