Neville Featherstone : North France and Belgium Cruising Companion before purchasing it in order to gauge whether or not it would be worth my time, and all praised North France and Belgium Cruising Companion:

With all its variety of ports, harbours and anchorages, Belgium and France's north coast is a fascinating cruising ground. This full colour companion to the area is ideal both for browsing in the winter as well as for daily on board use at sea. Covering all the shore facilities in depth, it also introduces new and original detail to navigation, and comprehensive information about where to eat, shop and visit as well as local facilities, chandlers, boatyards and

engineers. Covering from the Westerschelde to the Cap de la Hague, including the Seine to Paris, the approach and aerial photos, coupled with the informative charts and illustrations, bring the whole area alive. Provides a truly practical slant on the day-to-day needs of family, crew and boat in a foreign land.
