Ordnance Survey : Northern Scotland, Orkney and Shetland (OS Travel Map - Road Map) OS before purchasing it in order to gauge whether or not it would be worth my time, and all praised Northern Scotland, Orkney and Shetland (OS Travel Map - Road Map) OS:

3 of 3 people found the following review helpful. The North of Scotland...By HMS Warspite Ordnance Survey publishes maps of the United Kingdom in a variety of scales. The Road Traveler Series provides regional coverage at a 1:250,000 scale. There are a total of eight sheets for the whole of Britain. Road Travel Map #1 is "Northern Scotland, Orkney Shetland." The coverage of Map#1 begins a line across central Scotland marked by Montrose on the North Sea, Pitlochry on the A9 north of Perth, and Balanchulish near Glen Coe in western Scotland. Map#1 covers all of Northern Scotland except Skye and the Outer Hebrides. It includes the Orkney Islands and the Shetland Islands in separate map insets. The scale and multicolored presentation permit road travel planning and navigation between the principal population centers, and an appreciation of the terrain. The map includes a handy place names index to locate any of the numerous small towns and villages to be found in northern Scotland. Map symbology is sufficiently detailed to highlight points of tourist interest such as castles, vistas, train stations and camping grounds. The map does not provide sufficient detail for cross-country or over water navigation. There are other Ordnance Survey products for those needs. "Ordnance Survey Road Travel Map #1: Northern Scotland, Orkney and Shetland" is very highly recommended to travelers and others needing a large scale map for planning and navigation purposes.

The eight regional Road Maps of the OS Travel Map series show the road network of Great Britain plus tourist information and places of interest as well as a place names index. All motorways, A roads and B roads are marked, making route planning simple.
