From CICERONE EXPLORE THE WORLD : Pembrokeshire Coast Path Map Booklet: 1:25,000 OS Route Mapping before purchasing it in order to gauge whether or not it would be worth my time, and all praised Pembrokeshire Coast Path Map Booklet: 1:25,000 OS Route Mapping:

All the mapping you need to complete the 180 mile/290km long-distance Pembrokeshire Coast Path National Trail from Amroth to St Dogmaels in Wales. It typically takes two weeks to walk the whole trail, but it lends itself equally to day walking. It is suitable for walkers at all levels of experience. This booklet of Ordnance Survey 1:25,000 Explorer maps has been designed for convenient use on the trail. It shows the full and up-to-date line of the Pembrokeshire Coast Path, along with the relevant extract from the OS Explorer map legend. It can be used when walking the trail in either direction. It is conveniently sized for slipping into a jacket pocket or top of a rucksack and comes in a clear PVC sleeve. This booklet is included with the Cicerone guidebook to the Pembrokeshire Coast Path National Trail. Renowned for its spectacular scenery, flowers, and wildlife, this route through the Pembrokeshire Coast National Park takes in some of Britain's finest coastal walking, in an area steeped in history.

About the Author Dennis and Jan Kelsall published their first Cicerone title in 1995 and have since written around 35 guides to some of Britain's most popular walking areas: they have also become regular contributors to various outdoor magazines. Their enjoyment of the countryside extends far beyond a love of fresh air, open spaces and scenery: over the years Dennis and Jan have developed wider interests in the environment, geology and wildlife, as well as an enthusiasm for local history, which so often provides clues to interpreting the landscape.
