From Michelin : Poland (Maps/Country (Michelin)) by Michelin Travel Lifestyle (2012) Map before purchasing it in order to gage whether or not it would be worth my time, and all praised Poland (Maps/Country (Michelin)) by Michelin Travel Lifestyle (2012) Map:

0 of 0 people found the following review helpful. Not as durable as older Michelin maps
By Sailor7Nice complete map. It is not as durable as previous Michelin maps. It has a small hole in it at a crease.
2 of 2 people found the following review helpful. Great Map.
By Brian Lange.In the days of smart phones and GPS, paper maps have become mostly obsolete. I liked this map mostly for the fact I can route my entire trip on physical paper and see the distances I am travelling.This was useful in that it showed major roads and even continues the roads into neighboring countries, which show a fair amount of land respectively. What was unfortunate is that I got it out once during the trip to see if I could find my way to a location in Warsaw, but it doesn't show enough details of the cities. It'll do you good if you're going long distances, but not really useful if you're going just around a city or staying nearby.As I said before, electronic devices now replace these prehistoric paper tools.
