Reise Knowhow : Poland North 1:350,000 Travel Map, waterproof, GPS-compatible, 2014 edition, REISE

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Poland North 1:350,000 Travel Map, waterproof, GPS-compatible, 2014 edition, REISE:

Poland North 1:350,000 Travel Map, waterproof, GPS-compatible, 2011 edition, REISE This map is waterproof and tear-resistant, durable enough to survive time spent in the rucksack, pocket or on a restaurant table. It is double-sided to provide the best balance between a good scale and a convenient sheet size (size 100 x 70 cm / 39.5 x 27.5 in) with topographic and tourist information. The map divides northern Poland east / west, with a small overlap between the sides. Coverage extends south to the Bydgoszcz - Pultusk line. Names of many towns within areas which during the 19th and part of the 20th century were in Germany are shown with their historical German equivalents. Road and rail networks are easy to see on a clear base which shows the area's topography by altitude colouring with contours and spot heights. Names of the region's numerous national or regional parks and lake districts are clearly marked. Road network includes unsurfaced local roads and indicates locations of border crossings. Internal administrative boundaries are shown with names of the provinces. Symbols highlight various places of interest, including campsites, castles,

churches, viewpoints, etc. Names of some sights are shown in German. The map has a latitude and longitude grid at intervals of 20' and an index of place names. Multilingual legend includes English, high quality German cartography.
